JANUARY, 2013

To: All principals of colleges presenting
candidates in the Teacher Education examinations.

TEACHER EDUCATION EXAMINATIONS (SNE/DTE/PTE/ECDE/TCAE) CANDIDATES' RANDOM INDEX NUMBERS

As was the case in 2012, the Kenya National Examinations Council has assigned random index numbers to be used by all candidates taking the Teacher Education examination.

1. In assigning these random numbers, the county, district and school code numbers are affected. The last 3 digits of candidates' index numbers remain the same.
2. Candidates must use only the random numbers in their examination scripts.
3. Regular index numbers as well as random numbers have been sent to each examination centre together with computer labels showing the name of each candidate and his or her random index number. The labels should be stuck on the top left-hand corner of candidates' desks for reference. Candidates need not memorize their random numbers.
4. The random index numbers will be used by candidates in writing the examination and by examiners in marking. Thereafter the results and certificates will be issued according to the regular index numbers. After the examination, any enquiries must carry regular index numbers of the candidates.
5. The information on random numbers must be kept strictly confidential.

It is important that all principals of colleges presenting candidates for the Teacher Education examinations read this circular carefully to ensure correct implementation. More information on random numbers is given in the Instructions for the Conduct of Teacher Examinations.
